+ Create issue

Spending Tracker / HOB-3

Create an add function

 Attach  Add a child issue  Link issue ▼ ...

Description

As the user

I want to be able to add new spending info into the database

So that the database is always up to date

Add new entry: acceptance criteria

Given the user is on add section

When new all details have been entered

And pressed enter

Then the new entity will be added to the database

 Configure

Create an update function

📎 Attach 🧩 Add a child issue 🔗 Link issue ▾ ⋮

Description

As the user

I want to be able to amend spending info for any entry

So that all details are kept correct

Amend entry: acceptance criteria

Given the user is on the update section

When the new details have been inputted

And pressed enter

Then the newly inputted information will replace the previous ones

Activity

Complete a risk assessment

📎 Attach 🧩 Add a child issue 🔗 Link issue ▾ ⋮

Description

Create a matrix that lists any potential risks to project with a solution on how to act when the situation arises and state some preventative measures to reduce the likelihood.
